G - Edge distance _____"

*allow for width of bead

Check valve (s) location: Left Center Right Other (specify)

NOTE: DIAGRAM ILLUSTRATES BLANKET IN CLOSED POSITION (BEAD DOWN) SPECIFY VALVE LOCATION ACCORDINGLY.

VACUUM BLANKET

Type 1/72 Black
1/32" Thick

Black synthetic rubber with high tensile strength, high tear strength, and very high elongation. Quick draw down. Most economical.

Type 1HD/72
1/16" Thick

Same material as above but increased thickness provides longer wear and less possibility of tearing. Smooth finish.

Type 1HD/72FF
1/16" Thick

Same as Type 1/HD/72 except fabric finish on one side that allows faster air evacuation.

Type 2
1/4" Thick

Black sponge rubber one side and blue nylon one side. Rugged nylon reduces tearing from the sharpest frame corners.

Beading

Black sponge rubber with outside facing tips to insure maximum vacuum seal.
